Reboisement moringa à Badjengo	Badjengo est situé dans la zone sahel du Cameroun où un arbre est une source de joie pour l'ombrage. Faire le reboisement pendant cette période des pluies, est l'occasion pour augmenter les arbres à Badjengo. Nous proposons l'arbre du moringa parce que le moringa sera également utile pour l'alimentation des familles de Badjengo. Pendant cet événement, les jeunes de Badjengo seront au centre car c'est eux vont faire les pépinières, planter et se former sur l'utilisation efficace du moringa pour le bien-être des populations de Badjengo. Sensibilisations	Les filles dans le monde et en particulier dans les pays en développement et notamment le Tchad continuent d'être discriminées injustement en raison de leur sexe ou pire encore elles sont privées d'éducation parce qu'elles naissent filles ou deviennent mères précocement. Cette raison ma pousser d'organiser un événement de sensibilisation. L'objectif c'est de sensibiliser les parents sur l'éducation et l'autonomisation des filles mères, pour ces dernières aient une place importante dans la société. Car nous ne pouvons pas les condamnées par ce qu'elles deviennent mères si tôt. Elles ont droit a l'éducation, santé comme tout autres.	Chad	Ndjamena	les centres communautaires. Les énergies renouvelables	À l'heure où le monde brûle à cause du réchauffement climatique causé par l'utilisation des énergies sales et polluantes, il s'avère nécessaire de se tourner vers d'autres alternatives et cela dans le but de léguer un monde parfait à des générations à venir. Les énergies renouvelables sont un moyen de concilier avec la nature et remettre la terre petit à petit dans sa casquette de la seule planète où il fait beau vivre car les énergies renouvelables sont propres, ne polluent pas, et sont accessibles à tous quelque soit l'endroit où on trouve. Public Health Service	What is the role of Public Health? Public health plays a very important role in protecting, promoting, and maintaining the health of entire communities. These communities may be as small as your neighborhood, or as large as the whole country. Many of public health's duties are health issues we face in everyday life-like protecting the drinking water, or ensuring the safety of food at local restaurants. Public Health also has a role in areas like dental health, preventing injuries, preparing for emergencies and disasters, monitoring the leading causes of death, and preventing the spread of disease. Empowering widows	Campaign against Sexual and gender-based violence ; women working in gold mines are sexually exploited by the men who dig for the stones. Most of the sites that are dug up are also owned by men. The women, therefore, have no bargaining power and as a result they end up engaging in sexual relationships with the men just to get a job that will earn them some money in return. This is a sad situation because some of these women are widows whose husbands died of AIDs . By getting involved with these men they infect them. Gender Base Violence	Gender-based violence is a phenomenon deeply rooted in gender inequality, and continues to be one of the most notable human rights violations within all societies. Gender-based violence is violence directed against a person because of their gender. Both women and men experience gender-based violence but the majority of victims are women and girls. Gender-based violence and violence against women are terms that are often used interchangeably as it has been widely acknowledged that most gender-based violence is inflicted on women and girls, by men. Eliminating Child Labor	After the civil war in Liberia, it has been difficult for her to put an end to child labor practices. According to the ILO 2006 report Liberia is one of the country that has worst form of child practices. The knowledge about child labor is relatively weak. The gross roots of commitment to reduce child labor are poor in Liberia. Child Labor instances are rampant across the country and they primarily exist in the mining, agricultural, homes and informal sectors in Liberia. For such reasons, child labor is view in Liberia as something only taking place outside the child home. Children's needs at school	So when I visited one of the primary school in "Bandjanbougou plateau". So, everything at that school are decript, there is no gateways about most of the different classrooms, and some bad seats for pupils. There is a lack of teachers, and pupils are just learning in a very bad condition. Thus, I would like to focalize, how to improve these pupils conditons's of learning, to rebuild that school like a better one, and then how to help them to have more teachers at their disponibility. At conclusion, it is important to notice that most of their parents are poor. Brand Audit on Plastic Waste	I will be holding a plastic pollution sensitisation, trash cleanup and a brand audit on the water plastic waste that would be found in the trash collected, at a primary school in my community. In my community and across my nation, all cities and big towns depend so heavily on packaged water in 500ml plastic packets for pure drinking due to the lack of sufficient clean and pure drinking water provided by the state. This mass consumption and lack of proper management system for it generated waste, it has resulted in polluting our backyards, streets, streams and even ocean. July 18 #HeroWeek	In every day we wake up to heroism. The greater challenge is in choosing how and to whom we act out our heroism towards. One can choose be a hero to themselves by giving themselves an excellent breakfast to start their morning, or they could take it an extra mile by preparing a lunch pack to give to a homeless person on their way to work/school/anywhere. We could be heroes to ourselves by keeping warm, or take it an extra mile by giving away a jacket to the homeless.
